

## Let ISPN Publicize your Psychiatric-Mental Health Nursing Programs!

The International Society of Psychiatric-Mental Health Nurses (ISPN) is a US-based, international, advanced practice nursing organization with over 600 members. Our membership includes faculty educators, researchers, nurse practitioners, and graduate nursing students.

Graduate nurses considering a career in psychiatric-mental health nursing often contact ISPN members or visit ISPN's website to find out more about advanced psychiatric-mental health nursing practice.

In a new initiative, ISPN is delighted to provide an opportunity for our nursing school colleagues to publicize their graduate programs on a dedicated page of our website ([www.ispn-psych.org](http://www.ispn-psych.org)) for a relatively small fee:

- \$150 for 3 calendar months
- \$275 for 6 calendar months
- \$500 for 12 calendar months

We will provide brief details of your program(s) on our website together with hyperlinks to your institution or program web pages. We can also incorporate any relevant logos into the list if you supply us with the relevant images. Links to our dedicated graduate nursing programs webpage will also be publicized regularly through our social media accounts.

For user-friendliness, listings of this kind are typically provided alphabetically by region or by institution name. However, we will ensure equity for all listings using a rotating 'featured program' at the top of our dedicated webpage for no additional charge.

If you would like to take up this offer to boost your program recruitment please [complete this form](#) or if you would like to discuss things further, please contact [Jess Retzlaff](#), ISPN Executive Director.
